

Purpose

The purpose of this policy is to protect the environment through compliance with applicable jurisdictional, local environmental laws and regulations. Araam Sleep Products will work to integrate environmental considerations and alternatives into our business decisions wherever possible.

In all our activities, Araam Sleep Products will aspire to

- Comply fully with all applicable jurisdictional and local environmental laws and regulations.
- Minimize waste and increase recycling within the framework of our company.
- Involve employees, clients, suppliers and contractors in the implementation of Araam Sleep Products objectives.
- Promote environmentally responsible purchasing practices.
- Strive for continuous improvement in our environmental performance.

We love our planet

- Our wood is from suppliers that support sustainable sources.
- Our products are 100% recyclable at the end of their life cycle.
- Double sided beds for a longer lasting life cycle resulting less beds in landfill.
- Industry available environmental-friendly materials are preferred to be used in mattresses.
- Manufacturing remnants and packaging materials strive for recycling collection markets.
- Constantly seeking methods to reduce and reuse packaging.
- Raw material and finished goods products are manufactured in a “Just in Time” process reducing energy use, minimizing waste and warehouse space.
- Manufacturing equipment are maintained and operated to minimal energy consumption, and maximum waste reduction.
- Natural and renewable fibers are used for some supplier’s fire-retardant barriers.
- Facilities are cleaned and maintained using environmentally friendly products.
- Natural lighting, energy efficient lighting, and heating systems.
- Use of recycled office products.
- Reduction of printed materials with the use of electronic documents.
- Recycling of office paper waste.
- Canadian as much as possible.
