

Total Quality Assurance

Araam Sleep Products, as a leading bed and mattress Canadian manufacturer, we are committed to working to the highest standards, and you can trust that our products are clean, safe and durable. This is how we deliver total peace of mind guaranteed to all our customers.

- Our multiple series of in-process checks assure the quality of raw material and every finished product. This way you will receive products that have been made to last and deliver quality sleep night after night.
- When required, our raw material components meet or exceed stringent fire-retardant measures to ensure complete safety for you and your family.
- Upholstery can be a haven for bacteria, while also triggering allergies and exacerbating health issues such as asthma. This is why we only use clean fillings in our products. Our suppliers also incorporate treatments to reduce moisture and combat allergens for an all-round fresher and healthier sleeping environment.
- Our suppliers of natural products ensure supply chain traceability and forest sustainability. Both Araam and our suppliers are committed to environmentally responsible manufacturing and meeting the highest environmental and social standards.
- We are passionate about Canadian design and manufacturing, which is why all our mattresses and foundations are made in Canada. Our employees put a great deal of care and attention into their work, so every product that leaves the factory is of the highest quality.

When it comes to quality, we tick every box

As a group we are committed to ensuring total peace of mind for all our customers.

Extending our Quality Assurance

Our quality commitment extends to social, ethical and environmental responsibilities, and we are proud to be members of the key industry associations.
